## FACILITIES MAINTENANCE & MANAGEMENT

### Power Systems Support

---

#### What we do

The Power Systems Support Program provides technical support and supplemental funding for the Maintenance & Repair (M&R) of Embassy and Consulate compound power systems. Support ranges from in-house electrical support, to onsite service by qualified technicians, to contracting for a major repair or overhaul.

For all supported electrical equipment, the power systems support provide in-house subject matter expert review of BME service contract scopes. We provide sample scopes of work (SOW) for BME funded electrical service contracts and other electrical repair and service needs.

#### Products and Services:

- Generators
- Medium voltage automatic voltage regulators
- Low voltage automatic voltage regulators
- Switchgear and automatic transfer switch
- Motor-Generator
- UPS Systems
- Training - Electrical safe work practices

#### Funding

Power Systems are funded as a part of OBO's annual maintenance appropriation.
